

Dear Hiring Manager,

I am applying for the Project Management Intern position at Gain Solutions.

I am a Computer Science graduate (BSc completed, MSc ongoing) with a strong understanding of software development life cycle (SDLC) and hands-on experience working on web development projects using Laravel, Node.js, and REST APIs. Through these projects, I have gained experience in planning, coordination, and working collaboratively to deliver functional solutions.

I am highly interested in project management, especially in SaaS environments, and I am eager to learn tools like Jira and improve my ability to manage tasks, timelines, and team communication effectively. I am self-motivated, detail-oriented, and comfortable working in a structured team environment.

I would welcome the opportunity to contribute and grow as part of your team.

Sincerely,

MD. Assiqur Rahman
